

Remote Prescribing

Identify the need for a prescription only medicine through a telephone consultation

Write a physical prescription as normal, including OTC drugs if your patient need them

Scan the prescription

Find the name of the community pharmacy closest to your patients home using NHS Inform (<https://www.nhsinform.scot>)

Send the prescription from your nhs.net account to their nhs.net account with your patient's name CHI number if you know it and "URGENT PRESCRIPTION" as a header

Tell your patient where to go and timescale

Send the prescription to the pharmacy
