Dear Colleagues,

## Primary Care activity

As you are aware Scottish Government have said that continued financial support, at the current level, to practices will be predicated by their delivering around 20% of prior clinical activity. The measure that is to be used to define that activity level has yet to be finalized, but it will inevitably include elements of submissions you make to PSD about activity.

I am writing to remind you that there is still a requirement to make submissions about the activity that you are delivering under the NHS and using the PPE that is being provided for you by the NHS. I anticipate that there will be a linkage in the fullness of time between both reported activity and financial support and reported activity and continued supply of NHS PPE as the 2 are inevitably linked in terms of care delivery.

Please ensure timely returns to PSD to demonstrate the work that you are all delivering to support the NHS in these difficult times

With all my best

Angus Walls
